

**Robert Allen,
First Alternate Graduate Councilor**

I'm a Brother at the Delta Sigma Phi Chapter at Worcester Polytechnic Institute, and am currently in my third year studying mechanical engineering. After graduation, I hope to get my master's degree in materials engineering. Joining Alpha Chi Rho in my freshman year was a great decision which has shaped me into a better man today. I have served on my Chapter's executive council and my school's IFC. I was born and raised in Saint Petersburg, Florida and traveled to Massachusetts to escape the sunny weather in exchange for the blizzards at Worcester Polytechnic Institute. I'm excited to have the privilege to serve as the first alternate resident Councilor. I hope to make trips to different Chapters as my schedule allows.
